**Attachments:** image002.emz

I just confirmed with NGPRS that Jeremy will be on site tomorrow to locate the known anomalies and then to stake the remainder of the additional areas to be performed by the EM survey. This will be based on the NGPRS GPS locations. I will be on site at 8 am on Wednesday to meet with Jeremy. The Waste Connections part will be started on Wednesday morning followed by the Stratus portion of the site. NGPRS will flag any new anomalies and we can determine if test pits will be required on the new sites.

Let me know if there are any concerns or questions.

Yes, I'm available Wednesday through Friday. I plan to arrive at the site around 8am Wednesday.

On Mon, Nov 27, 2017 at 12:12 PM, Dave Folkes <[DFolkes@geosyntec.com](mailto:DFolkes@geosyntec.com)> wrote:

Curt,

Stratus will be sending a letter to you and Joyce later today describing the EM survey and test pitting investigation, and providing figures showing the landfill footprint and survey areas. I understand that these figures show the landfill area from your 5/12/17 letter, but please confirm when you receive it.

The EM survey at the Stratus property will start on Wednesday, are you available then? We would value your input on potential test pit locations based on EM anomalies, or any other considerations.

PSC has engaged a CABI and is preparing an asbestos plan, which will be submitted to EPA and CDPHE asap. We won't start test pitting (or other soil disturbing activities) until that's been approved, hopefully soon.

Best, Dave (Folkes)

Dave,

I am not available tomorrow. However, I do not need to be on site for the EM survey. The key is to make sure the EM survey covers the entire landfill footprint. The landfill footprint is shown on Figure 3-3 from the Revised Report on Nature and Extent Investigation dated 5/10/17 as modified by CDPHE letter dated 5/12/17. The EM results will be needed to conduct the test pit investigation. Is the test pit investigation still planned to start on Wednesday? Do you have a CABI lined up?

Thanks,

Curt

Curt, there is a chance we could start the EM Survey of the Waste Connections property tomorrow. I am not sure that it will work but do you need to be on site for that? Let me know and if you do, can you do it tomorrow or should we just wait for Wednesday morning.
